

Our worldwide reach and distribution

Our co-generation power plants ensure reliable supplies of heat and electricity to millions of consumers in Russia. Our own logistics and trading networks bring our high-CV coal to power plants around the world.

ISO 19600:2014 compliance ISO 37001:2016 anti-corruption **1**

The International Compliance Association (ICA) confirmed that SUEK's management systems comply with ISO compliance and anti-corruption requirements.

For more details, see page 116.

Reftinskaya GRES acquisition **2**

In October 2019, the acquisition of the Reftinskaya GRES was completed. The acquisition of this power plant has enabled SUEK to expand the supply westwards into the Urals and consolidate its position as one of the top power generators in Russia.

For more details, see page 29.

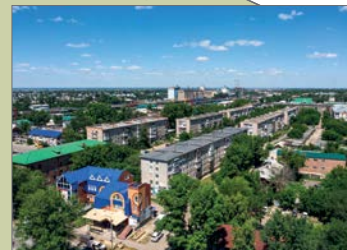

Expansion of higher-capacity railcar fleet **3**

SUEK acquired over 16,000 additional higher-capacity railcars. SUEK is now able to meet over 80% of its railcar needs and has become one of the largest operators of higher-capacity railcars in Russia.

For more details, see page 27.

Transformation of Rubtsovsk heating system **4**

SUEK invested around \$30m in the upgrade of Rubtsovsk heating system, reducing its failure rate by 32%.

For more details, see page 33.
